Ideation Phase
Brainstorm & Idea Prioritization Template

Date	15 October 2026
Team ID	23891A05C2
Project Name	Medical Diagnosis Center
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement

Manual and disconnected diagnostic-center processes make test booking, appointment scheduling, patient communication, report tracking, and record management difficult. The project proposes a centralized ServiceNow application and Service Portal to streamline these activities**.**

Team / Stakeholder Contributions

1. Patients: Book tests, view appointments, receive notifications, and download reports.

2. Receptionists / Staff: Maintain booking details, manage patient records, and coordinate appointments.

3. Lab Technicians: Update sample collection and processing stages and coordinate test availability.

4. Lab Manager / Administrators: Manage test approvals, monitor dashboards, and handle escalations.

5. ServiceNow Administrator / Developer: Configure tables, forms, portal pages, workflows, access controls, and notifications.

Guiding Principles

- Provide a simple patient experience.
- Prevent overlapping appointments.
- Protect medical information using role-based access.
- Track report status from sample collection to report availability.

- Use dashboards to improve operational decisions.

Step-2: Brainstorm, Idea Listing and Grouping

The ideas from the project are grouped by the operational need they address.

Patient experience

- Service Portal home page and online patient registration
- Book a Test page with diagnostic test, date, time slot, and patient details
- My Appointments page with cancellation / rescheduling support
- View / Download Reports page

Booking & lab operations

- Real-time slot availability and capacity validation
- Prevent overlapping appointments for the same equipment or technician
- Track status: Requested → Confirmed → Sample Collected → Processing → Completed → Report Available
- Optional Lab Manager approval for special or high-value tests

Communication & control

- Email notifications for confirmation, approval / rejection, payment, reports, and cancellation
- Escalation alerts for delayed report processing
- Role-based access for patients, staff, technicians, and administrators
- Audit trail for compliance and record accountability

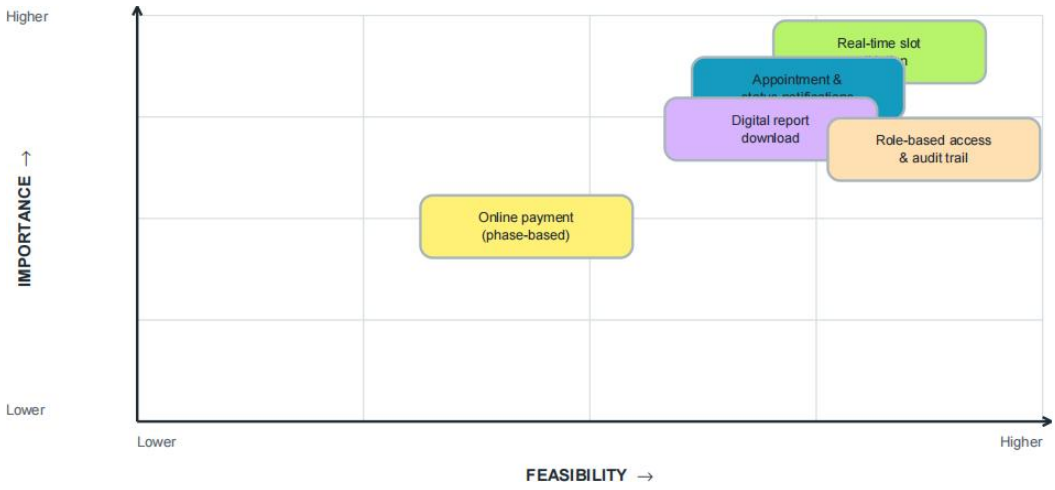

Reporting & future enhancement

- Management dashboard for test volume, revenue, peak hours, and popular tests
- Resource planning for lab equipment and staffing
- Optional phase-based online payment, invoices, and receipts

Step-3: Idea Prioritization

Ideas are prioritized by importance to the project and feasibility based on the proposed ServiceNow implementation. The matrix is a planning

aid; online payment is marked as phase-based in the project.

Priority	Idea	Reason
1 - High	Real-time slot validation	Prevents overlapping bookings and supports reliable scheduling.
2 - High	Appointment / report status workflow and notifications	Keeps patients and staff informed throughout the diagnostic process.
3 - High	Role-based access and audit trail	Supports secure handling of medical data and accountability.
4 - Medium	Dashboards and resource analytics	Helps management monitor demand and plan staff / equipment.
5 - Phase-based	Online payment and digital receipts	Useful enhancement; project describes it as optional / phase-based.
