Empathy Map Canvas

Medical Diagnosis Center – Empathy Map

An Empathy Map Canvas helps us understand the needs, thoughts, feelings, and behaviours of patients in a Medical Diagnosis Center. It helps identify patient problems and improve their overall experience through a simple and user-friendly ServiceNow application.

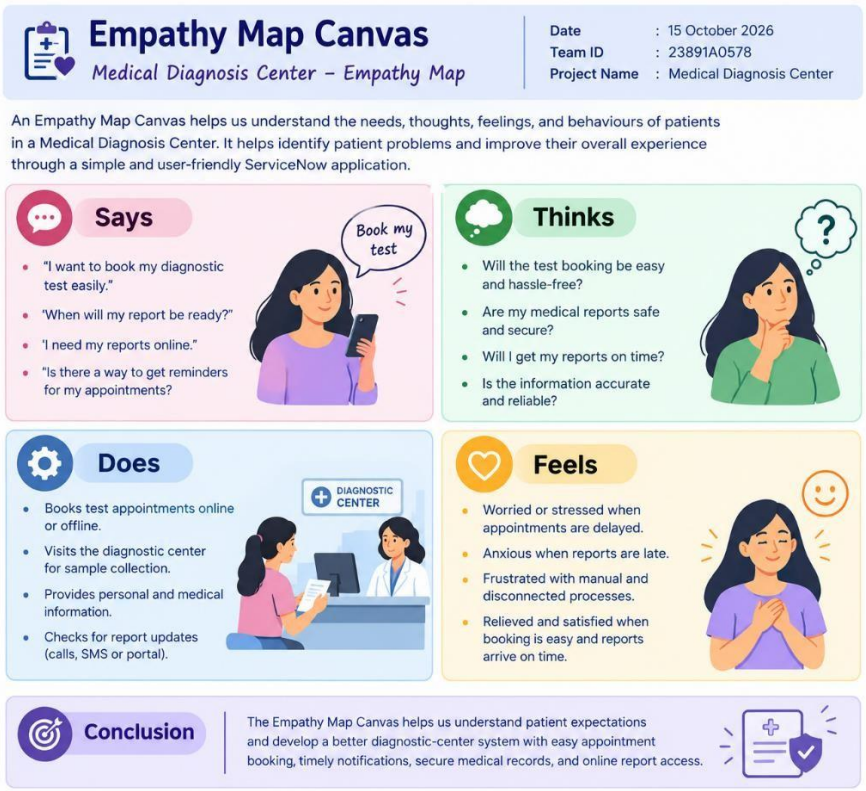

Says: Patients want easy test booking, timely reports, and online access to their medical records.

Thinks: Patients are concerned about appointment availability, report accuracy, privacy, and delays.

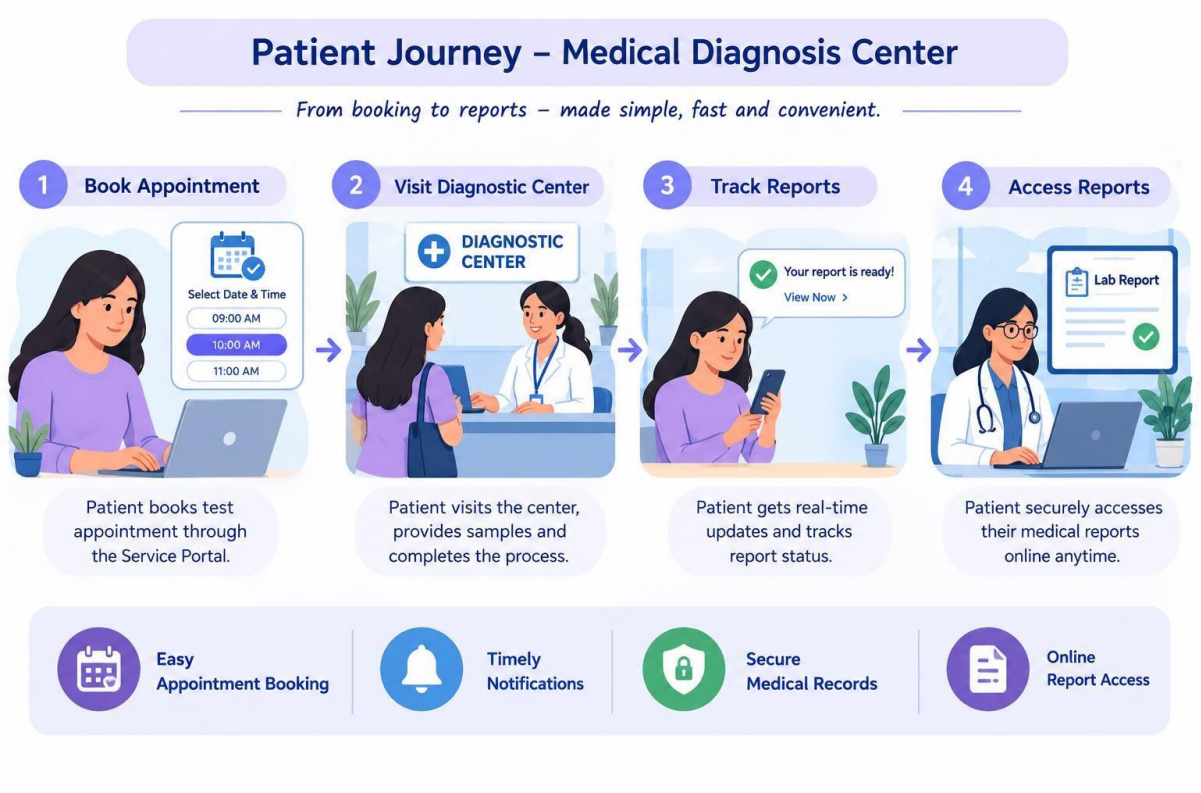

Does: Patients book test appointments, visit the diagnostic center, provide samples, and check report updates.

Feels: Patients may feel worried about delays and frustrated with manual processes. They feel satisfied when appointments are easy to book and reports arrive on time.

Example 1 :

Example 2 :

Conclusion:

The Empathy Map Canvas helps us understand patient expectations and develop a better diagnostic-center system with easy appointment booking, timely notifications, secure medical records, and online report access.
