Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	15 October 2026
Team ID	23891A05C2
Project Name	Medical Diagnosis Center
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Patient Registration	Registration through Form, Validate patient details,Generate a unique Patient ID
FR-2	Diagnostic Test Booking	View available diagnostic tests, Select test and appointment slot, Book a diagnostic test
FR-3	Appointmnet Management	View appointment details, Track appointment status, Cancel eligible appointments, Prevent duplicate slot bookings
FR-4	Report Management	Update sample and test status, Upload and manage diagnostic reports; view and download completed reports
FR-5	Notifications	Send email confirmation for appointments; Notify patients about appointment and report status updates
FR-6	Role-Based Access and Administration	Provide role-based access for receptionists, lab technicians, and administrators; Manage patient, appointment, test, and report records

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The Service Portal should provide a simple, user-friendly interface for patient registration, test booking, appointment tracking, and report access.
NFR-2	**Security**	Patient information and diagnostic reports should be protected using authentication, role-based access, and appropriate record permissions.
NFR-3	**Reliability**	The system should maintain accurate patient, appointment, test, and report records and validate information before saving.
NFR-4	**Performance**	The portal should load test catalogs, appointment details, and reports promptly under normal usage conditions
NFR-5	**Availability**	The application should be accessible whenever the ServiceNow instance is available, except during

		maintenance or service interruptions.
NFR-6	**Scalability**	The system should support the addition of more patients, diagnostic tests, appointments, and reports as the center's requirements grow.
